

Cashier PINs Prep

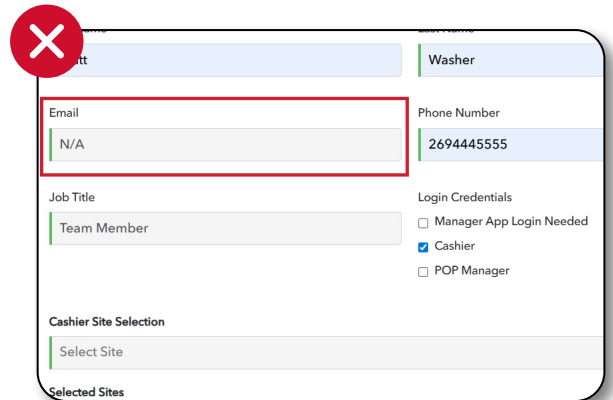

Background

Cashier PINs are coming soon to the point of purchase, adding an advanced level of **accountability** and **access control**. To ensure this update works seamlessly, sites must have accurate email addresses and proper login credentials set up in Manager App for all Team Members.

Current Issues

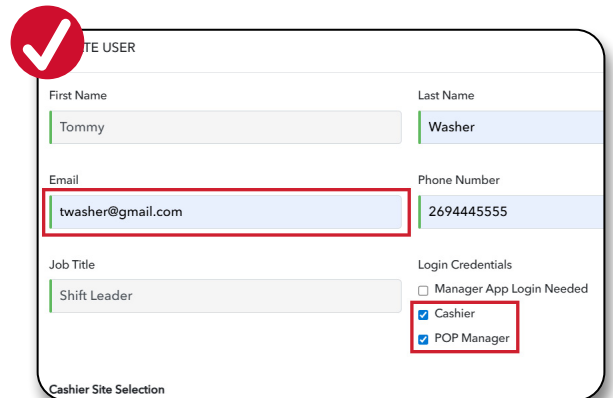

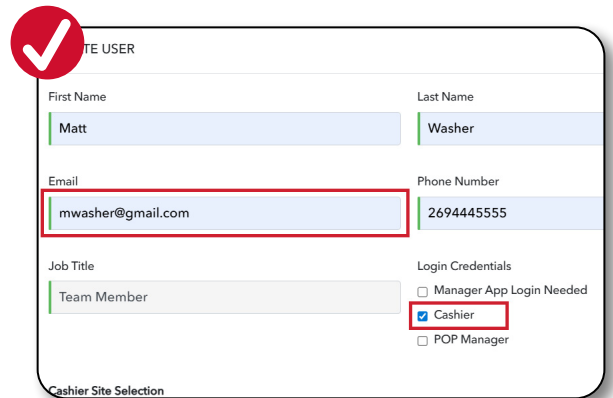

Many Team Members are currently set up in Manager App **without accurate and/or unique email addresses**. When PINs are created or when a PIN reminder is sent, the email is delivered to the address entered in Manager App. If a valid email address is not on file, the Team Member will **not be able to access their PIN** and log in on the POP.

Action Items

Confirm that each Team Member has an accurate email address in Manager App and that the appropriate login credentials are selected. Go to **Settings > Manage Team** to edit these fields.

Team Members should have the **Cashier** login credentials selected, while Shift Leaders, Assistant Site Leaders, and Site Leaders should have both **Cashier** and **POP Manager** selected.
