

Project Title: Stainless Steel Fan Cover

- The new Tommy Car Wash Systems stainless steel fan cover has been created mainly for coastal sites that have large issues with previous covers rusting out quickly. The stainless steel construction will allow for a much longer life than previous fan covers. This will be available only as a replacement option for any site.

Project Background:

We have had a high amount of replacements for our standard fan covers - mainly at coastal sites, that have a high salt content in the air. We have developed a fully stainless steel fan cover for these sites, to extend the life of the cover.

Why: To lower the overall cost to sites who replace many fan covers.

Who: Project Lead: David Bouwman / Isaac DeJong

What: Stainless Steel Fan Cover

Where: Will be installed on all blower motor fan covers.

When: Q4 2022

Install Test Site(s):

Overview: Installed at Hudsonville

Criteria:

1. These are provided as an option for replacement covers only. They will not be an option to be installed on new sites.

How to Order:

1. Order Part Number: P-B2075

Parts Affected

1. N/A. This is only an optional cover.

COST

1. Cost Estimates
